

*A new Dial by Mr. G. Wright*

“ENCYCLOPÆDIA; OR, A DICTIONARY OF ARTS, SCIENCES, AND MISCELLANEOUS LITERATURE” is in 18 Volumes. It is probably based on the foregoing book. It has a substantial section on Dialling with the following subjects, as they written in the margins beside the text:

- 1 Utility of this art.
- History
- 3 Definitions
- 4 The universal principle on which dialling depends.
- 5 Horizontal dial.
- 6 Vertical dial.
- 7 Inclining, reclining, and declining, dials.
- 8 Dialing by the common terrestrial globe.
- 9 To construct a horizontal dial.
- 10 An erect south dial.
- 11 Erect declining dial.
- 12 An easy method for constructing of dials.
- 13 Horizontal dial.
- 14 Dialing lines, how constructed.
- 15 A dial on a card.
- 16 Universal dials.
- 17 A new one by Mr G. Wright.
- 18 An equinoctial dial more universal.
- 19 Universal ring-dial.
- 20 Its use.
- 21 Universal cross-dial.
- 22 Easy method of drawing a dial by the universal mechanical dial.
- 23 Dials on three planes by one gnomon.
- 24 Improved declinator.
- 25 To take by it the declination, &c. and to find a meridian line.
- 26 A Meridian line.
